Quick Installation Guide

Kaspersky Lab
SOLE DISTRIBUTOR FOR HONG KONG
Lapcom Limited

<http://www.kaspersky.com.hk>

MINIMUM SYSTEM CONFIGURATION:

General requirements:

- Mac-based computer with Intel processor
- 512 MB RAM
- 100 MB of available hard drive space
- Internet connection (for product activation and updates)
- CD-ROM (to install Kaspersky Anti-Virus 8.0 for Mac from installation CD)

Operating systems:

- Mac OS X 10.4.11
- Mac X 10.5
- Mac X 10.6

INSTALLATION:

Please check system time and date:

- ✓ Before installing Kaspersky Anti-Virus for Mac Product, kindly make sure the system time and date is correct, as incorrect system time and date could affect the activation and operation of Kaspersky Anti-Virus for Mac Product.

Suggest to remove other brand of Anti-Virus software:

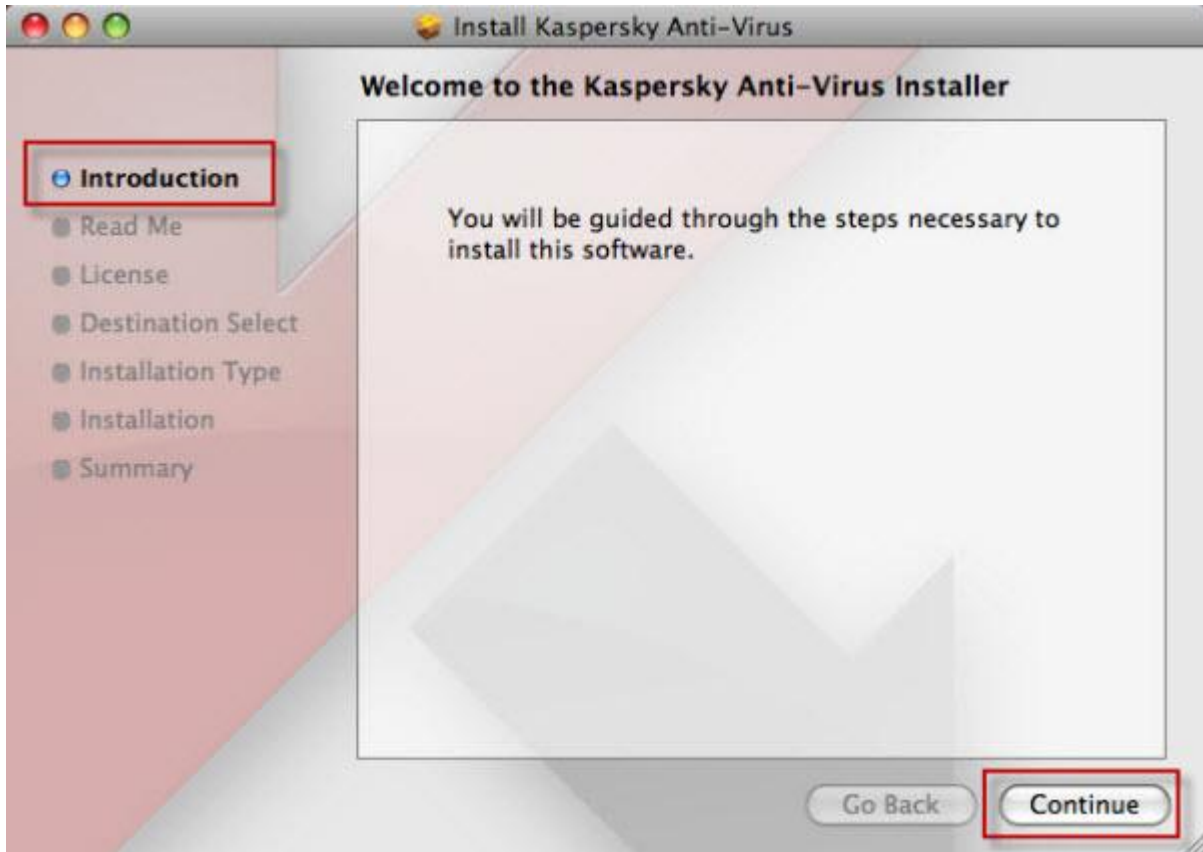

- ✓ You can install two or more antivirus applications on the computer running under Mac OS X, but you should understand that all installed antivirus applications consume system resources to scan the system for viruses. As a result, the system may be greatly slowed. (Suggest to remove other brand of Anti-Virus software before install Kaspersky Anti-Virus for Mac Product)

Step 1: Please insert the installation CD into the CD-Rom; and then click the **Kaspersky Anti-Virus** Icon on the desktop.

Step 2: In the **Kaspersky Anti-Virus** window, select **Kaspersky Anti-Virus** and double-click it:

Step 3: In the **Introduction window**, click the **Continue** button to start the installation process:

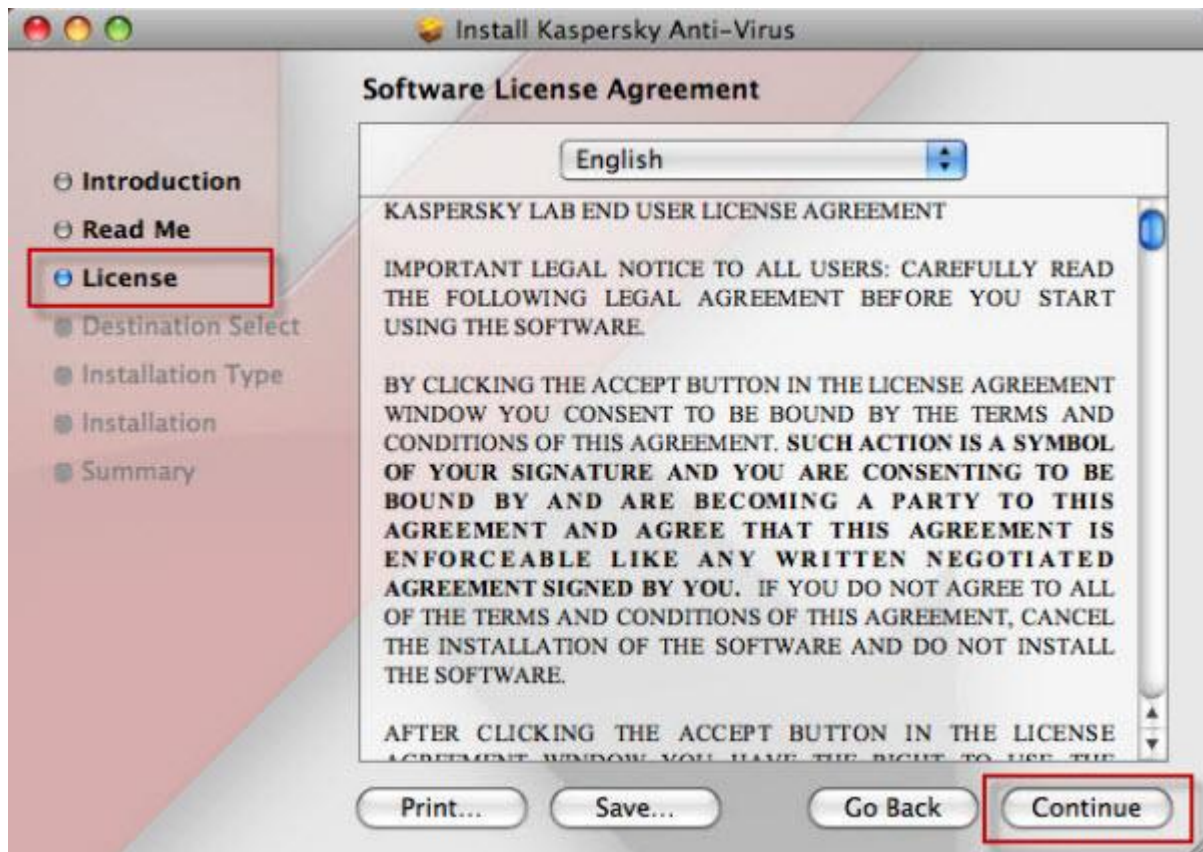

Step 4: In the **Read me** window, review the main **Kaspersky Anti-Virus** functions and the system requirements.

To continue, click the **Continue** button:

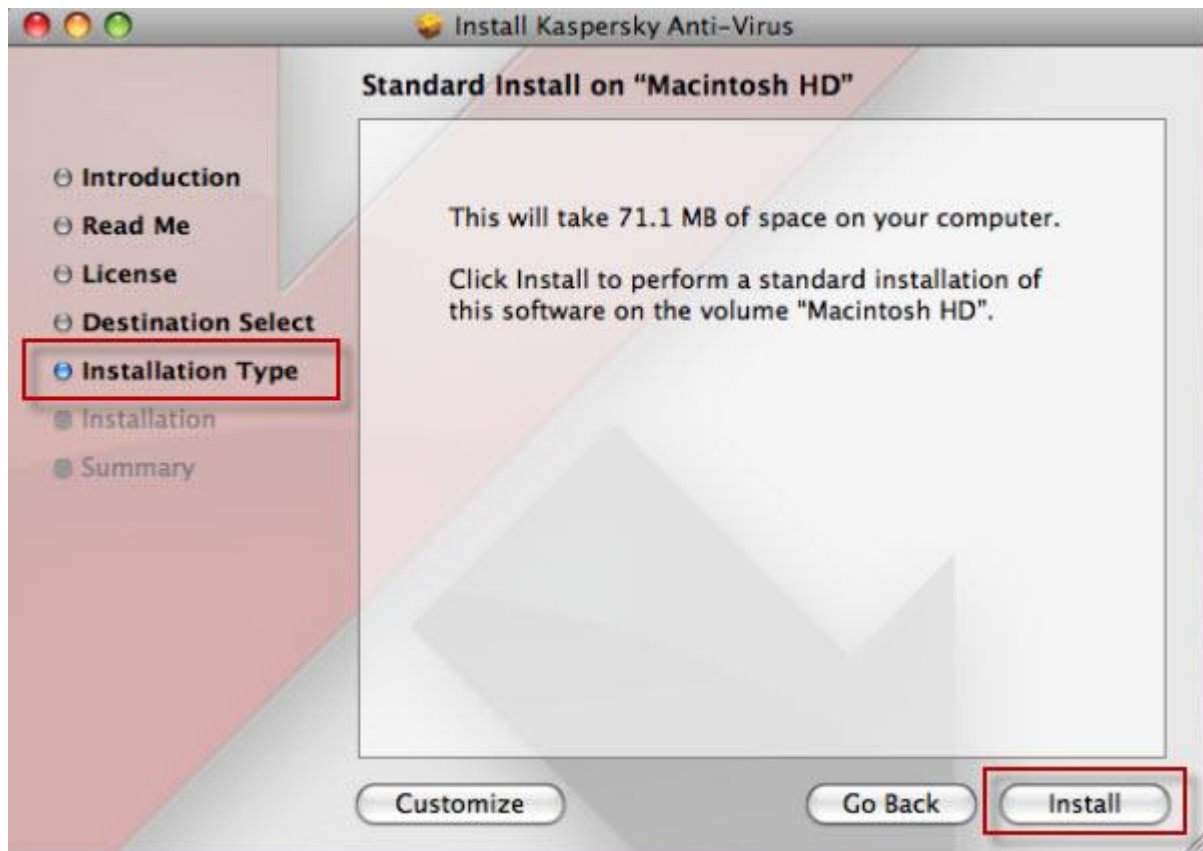

Step 5: In the **License window**, read carefully the license agreement to exclude disputable questions related to the product use. Click the **Continue** button to continue:

Step 6: To confirm that you agree to the terms of the license agreement, click the **Agree** button:

Step 7: In order to install the application, click the Install button:

Step 8: Enter Name and Password of the administrator account to confirm the **Kaspersky Anti-Virus** installation.

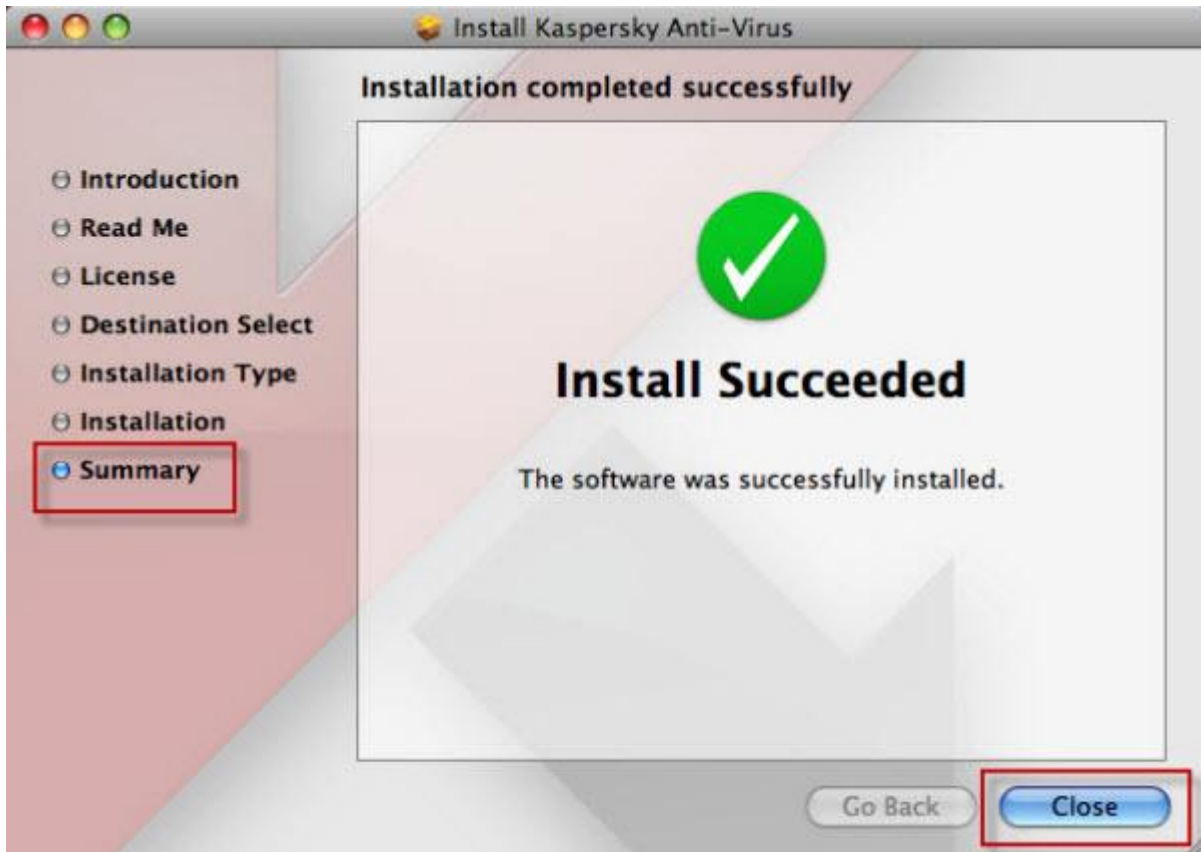

Click the **OK** button:

Step 9: Wait until the installation process complete.

In the **Summary** window, the “successfully installed of application” message will appear.

to close the installation window, click the **Close** button:

Step 10: Activate **Kaspersky Anti-Virus** using an activation code.

Step 11: Click the **Activate** button in the window that opens.

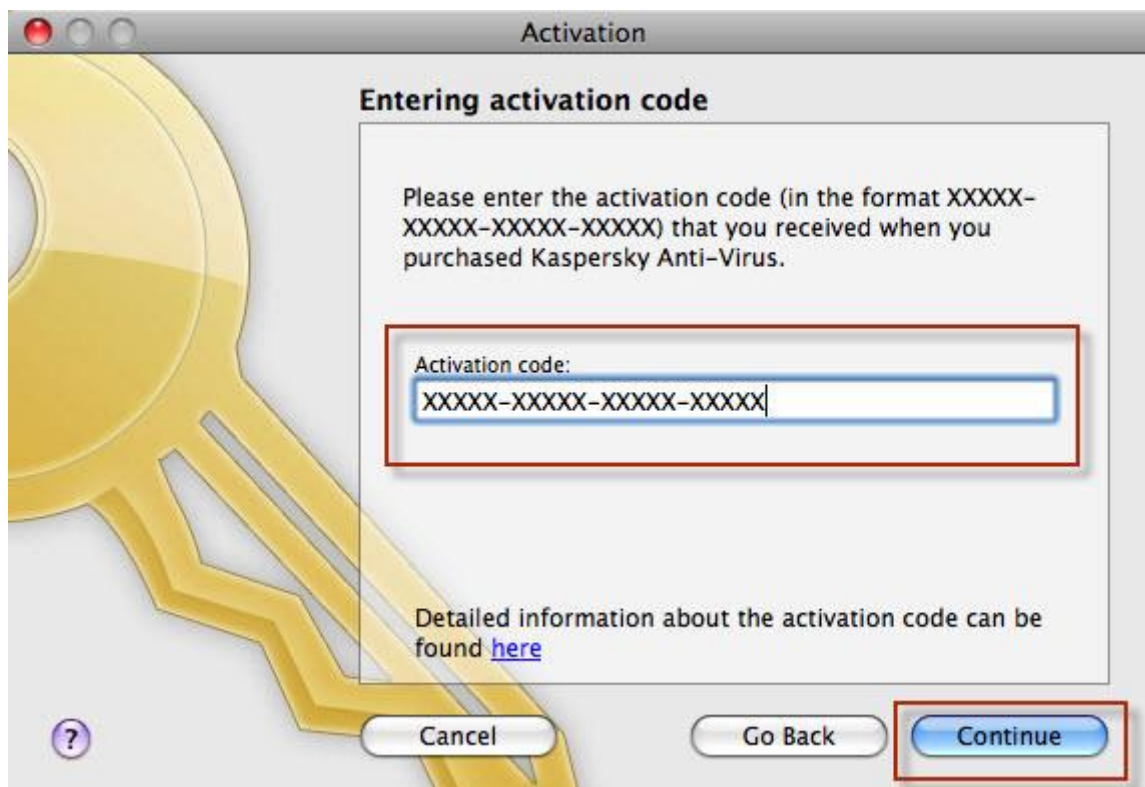

Step 12: In the **Activation method** window, chose **Activate using activation code**.

Click the **Continue** button at the right lower corner of the window.

Step 13: In the **Activation code** entry field, enter the activation code that **behind the CD Box**.

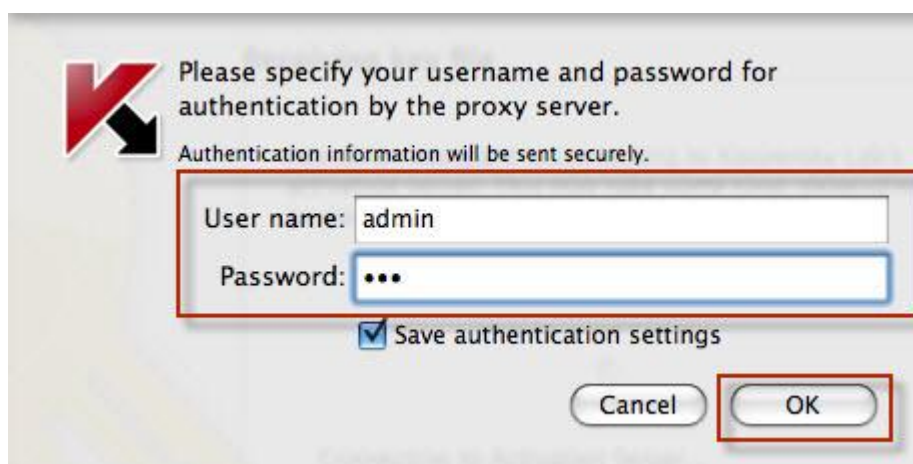

Click the **Continue** button for next step.

Remark: Activation code format is: **XXXXX-XXXXX-XXXXX-XXXXX**

Step 14: If you are using a proxy server to connect to the Internet, you need to specify your user name and password for authentication.

Click the **OK** button to start the process of connecting to **Kaspersky Lab** activation server.

Step 15: Wait until the process is completed.

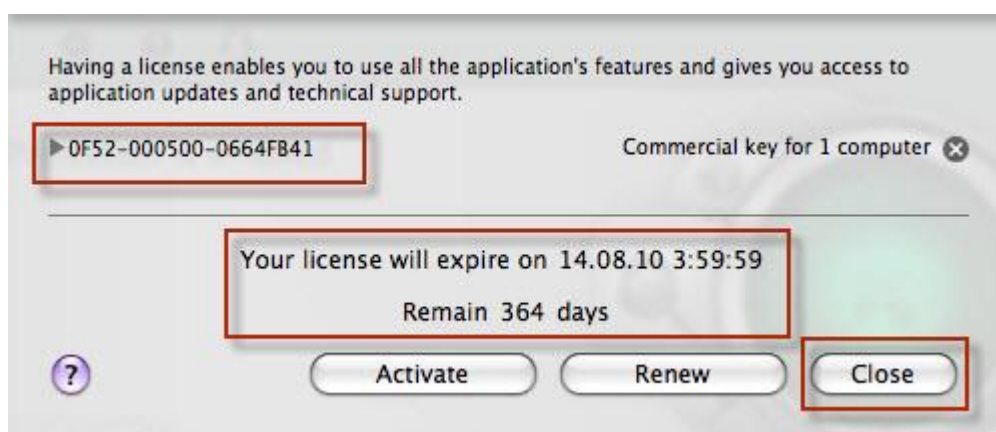

Step 16: If the activation is successfully done, then in the **Information about the key** window, you will see the message stating that the key file is successfully installed. Information about the key file is shown.

To finish the activation process, click the **Finish** button
